

# outdoor study

## WHAT ARE THE WORKSHOPS LIKE?

Our workshops and field studies take place in many spectacular locations. Generally we begin with classroom activities, multi-media presentations and discussions. Students are then prepared for the field investigations to follow. We spend as much time as possible in the outdoors. No previous experience is required but you will need to be comfortable in our outdoor classroom. Our workshops are designed to address a diverse audience.

**PLEASE NOTE THAT SEVERAL OF THE WORKSHOPS REQUIRE CONSIDERABLE HIKING, OFTENTIMES AT ELEVATIONS OF 6000 FEET OR MORE.** If you're in doubt, please ask we are happy to help!

Please come prepared for all kinds of weather our Idaho weather is predictably unpredictable. Appropriate hiking shoes, warm layers and rain gear are important. Your safety is very important to us and we use all discretion in our field work. Whenever possible, we will have vans but it may be necessary to carpool to our study sites.

After you have registered, we will provide information about the workshop times, necessary items, extra expenses, local lodging and nearby campgrounds. Each workshop accepts a limited number of participants. Don't delay register today!
